Hi Liz

Written confirmation for our screening letter.

Dear Kat,

I confirm that there are no TPO's to this site however the Upper Hill Street boundary marks the 'Naul's Mill' Conservation area. Along with the other boundary trees, these would be the priority trees advised for retention.

Kind regards

Robert

Good Morning Robert

Please could I chase the email below that I sent a few weeks ago. I have already discussed this with a couple of colleagues in your office via telephone who indicated that they couldn't identify any TPO's on this site however we'd like this confirming in writing please.

We are currently producing a screening letter in relation to the demolition of buildings on site and we would like this confirming before we submit the letter. Unfortunately it is becoming rather urgent.
