Subject: OUT/2017/0260 - Car Park 16 - Air Quality

Andrew

We note that one of the public consultation responses submitted in relation to the above application made reference to the Air Quality Report and the scope of the assessment work undertaken. Having reviewed these comments, the University and its Air Quality advisors (Arup) provide the following comments in response:

In terms of operational effects of the proposed development, no increase in vehicle trips is envisaged as a result of the application and it is expected that overall there will be a reduction in miles travelled as more car parking spaces will now be located on the approach roads to the University. Consequently, no adverse impact on air quality is anticipated.

In relation to construction effects, the submitted Air Quality Report sets out the methodology to monitor and mitigate any construction effects on air quality.

The approach taken in the AQA is considered to be robust and remains robust as a result of the TA Addendum 1.

We also note that the Council's Environmental Protection Manager confirmed no objection to the proposals subject to conditions.

Kind regards
Rachel
