- NOTES
• Drainage pipe sizes (where shown) have been gauged from the surface or by other means and should be regarded as approximate only.
• Tree species (where shown) should be treated with caution and expert identification is advised.
• Although this is a digital survey the accuracy and amount of detail shown is only commensurate with the practical limits of accuracy or specified. Care should be exercised when working to larger scales.
• Details referred to in the vicinity of the boundaries or shown above, may not represent the actual or legally conveyed contents.
• Where survey effort has been made to confirm structures on this plan, (SUDS, drainage, dimensions, levels and invert levels) should be checked prior to design and construction.
• Kerb levels have been taken in the bottom of the channel.
