## 5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

Mitchells and Butlers are currently refreshing the furniture and internal décor of the Public House, and want to take the opportunity to improve the front alfresco trade area.

The existing external trade area to the front aspect of the public house consists of an undulating raised area adjacent to the public pathway which is separated by the access road which prioritises the use of delivery vehicles. Whilst an acceptable arrangement, it has always been deemed a bit clumsy. The owners of the public house are seeking to rearrange this area to better serve patrons whilst still allowing access to delivery vehicles. The raised brick paver area will be removed back to the boundary line demarcated by the existing timber posts. A new dray delivery area will be created to the eastern aspect of the building frontage with removable posts and chains which will be in situ to prevent unauthorised use of the area but still allow booked deliveries to use the area. Sufficient space will remain for delivery vehicles to make their normal approach from the public highway, then back up into the new dray area for unloading.

## 5. Description of the Proposal

With the existing raised area dressed back to the timber posted boundary line, the western end of this area will be utilised as external area with timber posts to its east and west aspects to prevent vehicle access. To further improve the appearance of this new area the existing tarmac surface will be replaced with 600sq pavers with brick paver boundary edging.

By moving the trade area to this new inner area it will improve the appearance as all the bench seating will be in a more localised area and will be accessible directly from the public house without crossing an inner access road.
