4. Site Area

What is the measurement of the site area?
(numeric characters only).

195.41

Unit

sq.metres

5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

Installation of a Portakabin building to replace the current security gatehouse and also include a visitors reception, Occupational Health Clinic, toilet and a break area during lunch time.

Has the work or change of use already started?

Yes No

6. Existing Use

Please describe the current use of the site

Gate house

Is the site currently vacant?

Yes No

Does the proposal involve any of the following? If Yes, you will need to submit an appropriate contamination assessment with your application.

Land which is known to be contaminated

Yes No

Land where contamination is suspected for all or part of the site

Yes No

A proposed use that would be particularly vulnerable to the presence of contamination

Yes No

7. Materials

Does the proposed development require any materials to be used?

Yes No

Please provide a description of existing and proposed materials and finishes to be used (including type, colour and name for each material):

Walls

Description of existing materials and finishes (optional):

N/A

Description of proposed materials and finishes:

External walls are of a durable one-piece construction with high-performance, low-maintenance plastisol-coated galvanised steel cladding to offer protection against fire, extreme weather and accidental damage. Internally, the walls are of vinyl-faced plasterboard, providing a wipe-clean finish.

Roof

Description of existing materials and finishes (optional):

N/A

Description of proposed materials and finishes:

Outstanding insulation is provided by the construction of the roof. The roof deck is of one-piece construction and is impact resistant. It is covered with solar-reflective, profiled aluminium-zinc coated steel to reduce heat gain. Internally, the polyester-coated galvanised steel ceiling is designed to prevent condensation problems and has a low maintenance finish.

Windows

Description of existing materials and finishes (optional):

N/A

Description of proposed materials and finishes:

The windows have PVC-U frames and are double-glazed with low energy glass for optimum thermal performance. Draught and condensation problems are minimised by effective weather seals and the low thermal conductivity of the window frame and glazing materials. Windows in critical locations are glazed with toughened safety glass as standard with a variety of other glazing available as an option.

Doors

Description of existing materials and finishes (optional):

N/A

Description of proposed materials and finishes:

Steel-faced doors have an insulating core that minimises heat loss. The anodized aluminium frame also incorporates draughtproof weather seals. Ultima buildings offer protection against theft and vandalism, with a wide range of security options.

7. Materials

Are you supplying additional information on submitted plans, drawings or a design and access statement? Yes No

If Yes, please state references for the plans, drawings and/or design and access statement

Location and Block Plan
Design and Access Statement
